CAREER SUMMARY

Computer Engineer with over 5 years' experience specialising in Flutter and Dart, developing Android, iOS and web applications for real-world production environments. Expert in scalable architectures (Clean Architecture, MVVM, BLoC/Cubit, Provider), Clean Code and native integration with Kotlin and Swift. Full-stack experience with Python, FastAPI and PostgreSQL, and in cloud deployments on AWS using Docker. Experienced in working with remote and international Agile teams, with a focus on maintainable, product-oriented code. Open-source contributor with packages published on pub.dev. Winner of the ESII award for the most innovative final-year project (2022).

TECHNICAL SKILLS

Mobile: Flutter, Dart, BLoC / Cubit, Provider, Riverpod, DIO, L10n	Native: Kotlin (Android), Swift (iOS), Platform Channels, MQTT / IoT
Architecture: MVVM, Clean Architecture, Clean Code	AI / ML: TensorFlow, ONNX, OpenCV, NumPy, Deep Learning
Frontend: Responsive Design, Figma, Material Design, Adaptive UI	Backend: Python, FastAPI, Flask, PostgreSQL, Alembic, REST APIs, WebSockets, JWT
Cloud & DevOps: AWS (EC2, ELB, Route 53, VPC), Docker, CI/CD	Tools: Git, GitLab, GitHub, JIRA, Scrum / Agile
Testing: Unit testing, Widget testing, Integration testing	

WORK EXPERIENCE

SENIOR FRONTEND ENGINEER - FLUTTER

ENELGY | April 2024 - Present

- Development of a cross-platform web application using Flutter for Acciona Agua.
- Design and implementation of business logic and UI components, applying the principles of Clean Architecture and MVVM.
- Development of responsive interfaces optimised for different resolutions and devices.
- Integration with REST APIs using DIO.
- State management and reactivity using Provider.
- Application of Clean Code principles to ensure maintainability and scalability.
- Work in an Agile (Scrum) environment, using JIRA and GitFlow for version control.
- Active involvement in technical decisions and the organisation of the project code.

FRONTEND ENGINEER - FLUTTER

YOURSTEP | April 2023 - April 2024

- Development of a mobile app using Flutter for student academic management.
- End-to-end design and development of the app's business logic.
- Implementation of a BLoC/Cubit-based architecture for state management and reactivity.
- Integration of REST APIs using DIO.
- Layout of Figma designs using responsive design.
- Collaboration in an Agile (Scrum) environment using GitLab and GitFlow.
- Performance optimisation and modular code organisation.

SOFTWARE & SYSTEMS DEVELOPER

CIBINAR | July 2022 - April 2023

- Development of mobile applications using Flutter for smart facial recognition systems.
- Implementation of native code in Kotlin and Swift using Platform Channels.
- State management using Provider.
- Development of RESTful APIs using Python, Flask and FastAPI, running on AWS with Docker.
- Development of Python scripts for load testing deep learning models.
- Work with TensorFlow, ONNX, OpenCV and NumPy.
- Involvement in solutions related to computer vision and artificial intelligence.

MOBILE DEVELOPER INTERN

CIBINAR | 2021 - 2022

- Mobile app development using Flutter.
- Development of RESTful APIs using Python, Flask and FastAPI.
- Implementation of IoT communication using MQTT.
- Involvement in the design and integration of connected software solutions.

PERSONAL AND FREELANCE PROJECTS

FULL-STACK DEVELOPER

- Development of REST APIs using Python and FastAPI.
- Development of full-stack projects integrating Flutter and FastAPI.
- Design of front-end and back-end architectures using Clean Architecture.
- Implementation of authentication, validation and modular structuring of back-end services.
- Design and administration of PostgreSQL databases.
- Database migration and versioning using Alembic.
- Design and implementation of scalable cloud architectures on AWS (EC2, Elastic Load Balancing, Route 53, VPC and basic infrastructure management) using Docker.

OPEN SOURCE

- Development and publication of Flutter packages on pub.dev.
- Contribution to open-source projects related to Flutter and mobile development.
- Maintenance and enhancement of in-house libraries.

LANGUAGES

- Spanish — Native
- English — Intermediate
- Portuguese — Intermediate

EDUCATION

DEGREE IN COMPUTER ENGINEERING

University of Castilla-La Mancha | 2018 - 2022

- Campollano Foundation Award for the most innovative final-year project at the ESII (2021-2022).
- Honors in TFG
- Honors in:
 - Calculus and Numerical Methods
 - Computer Networks I
 - Logic

OTHER SKILLS

- Strong problem-solving skills
- Analytical thinking
- Technical communication
- Teamwork
- Proactivity
- Time management
- Adaptability
- Ability to learn continuously
